DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Obendiek.

Obendiek (2002/0171258) discloses the claimed invention including a convertible vehicle having an auto body with a movable roof 2 and at least one movable cover part 6 that covers a receiving area for the roof situated in the auto body when the at least one movable cover part is in a closed position and the movable roof is in an open position, and which can be moved up by at least one drive element 3, characterized in that the drive element is arranged on a holding device 1 that can be mounted on the auto body, which is also a support for at least one control unit 9, a hydraulic pump 10 and inherently connections of control lines leading to drive units for roof movement. The cover part can be moved by a single drive element.

3. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by WO02/43978.

WO02/43978 (Rawlings et al.) discloses the claimed invention including a multifunctional holding device 32 with several connection flanges to accommodate at least one control unit, a pump, and connections for emerging hydraulic lines, characterized in that the

holding device is designed as a support for at least one drive element for a cover part of a compartment top of a convertible vehicle.

Allowable Subject Matter

4. Claims 4, 6, and 11-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 8/5/08 have been fully considered but they are not persuasive. With regard to the claim objections and 112 second paragraph rejections, the applicant's response overcomes the objections and rejections. With regard to double patenting, the applicant's amendments to the claims overcome the objection.

6. With respect to the Obendiek reference applicant states the rejection requires each and every element set forth found either expressly or inherently described in the reference. The examiner believes this to be the case. Obendiek discloses the claimed invention as broadly recited and interpreted. With regard to applicant's argument that the limitations of intended use are not found in the reference, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. The Obendiek reference is structurally identical to the claimed invention.

7. With regard to the Rawlings reference, here again it should be noted that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. The examiner has further outlined the structural “flanges” as claimed with a marked up copy of Figure 5, hereto attached. It should be noted that several connection flanges are present and indicated with black arrows. These flanges can accommodate the structure.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
